

Second Grade News

April 3, 2008

Here's a peek at what we've been doing!

- ❖ In **Language Arts**, students are writing **informational** reports about **plants**. They have learned many interesting facts and are excited to share them with others through their writing!
- ❖ In **Science**, we are finishing up a unit on plants where we explored **plant parts and their functions, parts of flower, needs of plants, and plant adaptations deserts**. We planted radish and corn seeds to observe what plants need to grow, and made our own Chia pets!
- ❖ All Language groups are continuing to progress through the **Language! curriculum** and are gaining important reading and spelling skills. We are seeing remarkable improvements in these areas.
- ❖ Students who meet with me for math are exploring **hands-on subtraction concepts** and learning a variety of strategies to solve subtraction problems. We are also building **measurement concepts**, as well as continuing to review our **addition facts**.

Announcements
